

Flatcoated Retriever Sires 2014

The data in the table below is taken from the Kennel Club's Records as of 15th February 2015 and shows the stud dogs used from January 2014-December 2014 (as published in the Kennel Club Breed Records Supplements) the number of litters each dog has produced, and their Coefficient of Inbreeding (COI) taken from the Kennel Club's Mate Select online programme. Where there is no information available for a particular dog at present, you will find 'no data'.

The average COI of the Flatcoated Retriever is 7.4%; the higher the COI the greater the risk of inheriting a deleterious mutation from both parents increases.

An inbreeding coefficient of 12.5% means that there is a 1 in 8 chance that a dog will inherit the same version of a gene from the same dog that appears in both the sire's and dam's pedigree. The Kennel Club will no longer accept puppies for registration from mother/son, father/daughter or brother/sister mating. The COI of puppies born from these combinations would be at least 25%. Puppies born from a grandfather/granddaughter mating would have a COI of at least 12.5%.

Taken from the Flatcoated Retriever Society's Code of Ethics: **"Extensive use of any particular stud dog is actively discouraged"** and the Society does not recommend mating half siblings (half-brother/half-sister).

Mate Select on the Kennel Club Website: <http://www.thekennelclub.org.uk/services/public/mateselect/Default.aspx> follow the link to find out more about genetic diversity, individual COI, individual health test results, mating inbreeding coefficient prediction, estimated breeding values (EBV's) for hips and further breeding information.

Please read the KC's article on 'The Popular Sire Effect' here: <http://www.flatcoated-retriever-society.org/images/stories/health/the%20popular%20sire%20effect.pdf> before choosing a stud dog.

Notes to table:

- ❖ All dogs with COI below breed average are in dark green
- ❖ All dogs with a COI above breed average are in red
- ❖ % of litters sired in 2014 – the higher the % the more likely this dog is a "new" stud dog being used. Dogs that are becoming less popular will have lower % figures.
- ❖ Litters are taken from the KC Breed Record Supplement for each quarter of the year in which they are registered.

Name of Stud Dog	COI %	Cumulative Litters	Litters 2014	Jan-March 2014	Apr-June 2014	July-Sept 2014	Oct-Dec 2014	2014 as % of Total Litters
